DATA ANALYSIS, INTERPRETATION AND PRESENTATION

"Data analysis is the process of bringing order, structure and meaning to the mass of collected data. It is a messy, ambiguous, time-consuming, creative, and fascinating process. It does not proceed in a linear fashion; it is not neat. Qualitative data analysis is a search for general statements about relationships among categories of data."

Computer Science One

Science I (one intended for Computer Science majors, one for Computer Engineering majors, one for non-CE engineering majors, one for humanities majors, etc). The courses are intended to be equivalent in content but have a broader appeal to those in different disciplines. The intent was to provide multiple entry points into Computer Science. Once
